Creative Expression

Parallel Pen

with parallel plate nib

This new type of writing instrument introduces our development of "Parallel Plate Structure". The nib point, which consists of two parallel plates, can achieve more beautiful and sharper lines than existing calligraphy pens.

It can also produce attractive, graded colours by transferring ink from one pen nib to another pen nib. Two different ink colours can then be used from one pen nib to achieve this effect.

2 WAY WIDTHS OF STROKE

GRADATION

Using two PILOT Parallel Pens, each with different colour cartridges, beautiful graded lettering can be achieved.

Parallel pen
Available in convenient single pack including :

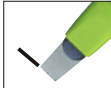

- Nib cleaner
- Black & Red ink cartridges
- Pipette
- Instruction and care guide
